## **DETAILED ACTION**

### ***Specification***

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The "1.6-6 side branches on the average" in claim 5 cannot be found in the specification. 1.5-6 is acceptable.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

3. Claims 1, 5, 9 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claims 1, 9 and 10 contain improper Markush language. If the last conjunction is "and" (and and/or is equivalent to and) the proper language has to be "selected from the group consisting of". In claim 5, line 2, the phrase "int eh" does not make sense. Claim 9 is rendered indefinite by the phrase "and/or derivatives thereof". Carbon dioxide is a rosin derivative. It is derived by burning.

### ***Claim Rejections - 35 USC § 103***

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 1714

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1-4 and 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hazen et al. 6,653,398, Minnesota Mining and Manufacturing Company EP 287 306 or EKA Nobel AB WO 92/01750, in view of Nunn, Jr. et al. 3,004,056.

7. Hazen et al. disclose a blend of tackifier and ethoxylated phosphate ester surfactant in column 5, lines 56-58 and PSA in claim 1. Minnesota Mining teaches applicants' surfactants, where "R" can be alkyl, on page 4, lines 12-35 and PSA in claim 1. Nobel AB recites tackifiers and ethoxylated phosphate esters where "R" can be alkyl in claims 1 and 2. Nunn, Jr. et al. reveal applicants' surfactant in claims 3 and 7. It would have been obvious to one having ordinary skill in the art; at the time the invention was made, to use the surfactant or Nunn, Jr. et al. in the compositions of the primary references, because of its superior compatibility and controlled viscosity properties.

***Allowable Subject Matter***

8. Claims 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Claim 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
